

## Caleb Spear, PE

My name is Caleb Spear, a licensed fire protection engineer with Michael Baker International. I've been an active participant in the SFPE Rocky Mountain Chapter and fire protection community since 2018. I am running for a Director position and aiming to assist the chapter continue their growth in participation and community outreach. I'm especially interested in increasing awareness of the FPE industry skillset and the value we add to our Architecture/Engineering, and Code Enforcement partners.

I have experience working as a fire sprinkler contractor and a fire protection engineer for multiple firms in the Denver area. My expertise involves building and life safety code analysis, fire alarm and fire sprinkler design, means of egress and passive fire protection evaluations. As a FPE, I often serve as the "bridge" between owners, contractors, and the AHJ to help ensure buildings are designed in a safe and functional manner that satisfies the needs of all stakeholders. With my experience, and the experience of SFPE as a whole, I would like to raise awareness of the solutions the FPE field can provide to the community.

I look forward to the opportunity to promote the SFPE Rocky Mountain Chapter! Thank you for your consideration.
