

William Fletcher, PE

William (Fletch) graduated from the University of Maryland with a bachelor's degree in Fire Protection Engineering in 2017 and has worked for Coffman Engineers ever since. Along with 6 years of professional experience, with projects ranging from DoD to smoke control modeling, William also **brings experience from serving as the VP of Operations for 2 years in the San Diego SFPE Chapter**. There he worked to help organize events such as the annual golf tournament as well as monthly meetings.

William moved to Denver from San Diego two years ago and has become familiar with the local codes and regulations. He is a licensed fire protection engineer in Colorado and California. He hopes to continue maintaining the high standards set by past board members which make the Rocky Mountain SFPE chapter a useful tool in our careers - helping to foster discussions and cultivate relationships amongst people from all aspects of the fire protection industry.
