

Gabriel Levy, EIT

Hi! I'm Gabe, with incandescence life safety. I've been a fire protection EIT since completing my undergrad in ME in 2019. I'm concurrently in the Cal Poly FPE program, with graduation in June! I started my career in San Diego before moving to Denver to join ils. My experience includes smoke modeling, code consulting, and life safety sheet design.

My goal as an engineer is to improve communication between disciplines in the building design process. As an SFPE Director, I plan to organize open forums where FPEs can discuss challenges in projects and difficulties specific to local jurisdictions.
